## New / Lead Titles

**Complete Psychology**

Second Edition

EDITOR AND AUTHOR: **Graham Davey**, *Professor of Psychology, University of Sussex, UK, and former President of the British Psychological Society*

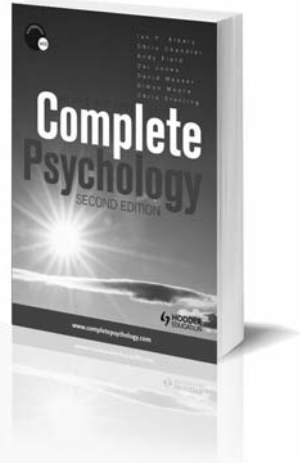

**Ian P Albery, Chris Chandler, Andy Field, Dai Jones, David Messer, Simon Moore, Christopher Sterling, Jon Sutton, Annie Trapp**

*'Complete Psychology is a textbook that lives up to its title. ... (It is) an authoritative and very readable introductory textbook ... I would have no hesitation recommending Complete Psychology to students.'*

LTSN Psychology – about the first edition

Written by an experienced and high profile author team, *Complete Psychology* covers everything students need to know in the first year, and provides a useful point of reference for the following years of study. All chapters include recent developments in the field, provide a wealth of examples of applied psychology in practice, and reflect the latest BPS curriculum requirements.

*Complete Psychology* remains unique in providing dedicated sections for study skills, research methods, statistics and careers and is comprehensive in its coverage of a diverse range of psychology topics. Lectures will benefit from the latest edition's increased offering of tutor-led activities – ideal for large classes.

**Based on feedback the following features are new to this edition:**

- **New class activity boxes** providing lecturers with instant teaching activities
- **Self-test questions, example essay titles and expanded reading lists** allowing students to consolidate what they have learnt
- **Numerous examples of psychology in applied settings** providing students with meaningful cases and scenarios
- **Glossary of important terms and concepts** ensuring students have a clear understanding of basic terminology
- **www.completepsychology.co.uk** providing MCQs and PowerPoint® presentations for lecturers, as well as revision support for students

**CONTENTS:** Section 1: Conceptual and Historical Issues / Section 2: Psychobiology / Section 3: Cognitive Psychology / Section 4: Developmental Psychology / Section 5: Social Psychology / Section 6: Personality and Intelligence / Section 7: Psychopathology and Health Psychology / Section 8: Research Methods and Statistics / Section 9: Careers and Study Skills

## Psychology

The Science of Mind and Behaviour  
Sixth Edition

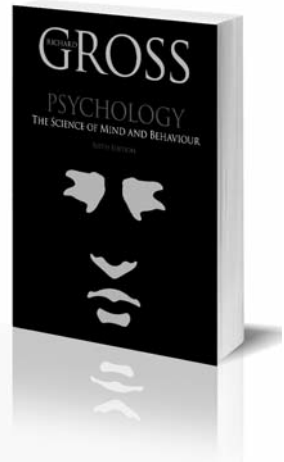

**Richard Gross**, *Bestselling psychology author and Honorary Lecturer in Psychology, Leicester University, UK*

Considered the 'bible' for students of Psychology and anyone in related fields such as Counselling, Nursing and Social Work who needs a reliable, catch-all text, Gross continues to set the standard for Psychology textbooks.

All the major domains of Psychology are covered in detail across 50 manageable chapters that will help students get to grips with anything from the nervous system to memory, from attachment to personality, and everything in-between. A final section on issues and debates allows students to cast a critical eye on the research process, to explore the nature of Psychology as an evolving science, and understand some of the ethical issues faced by Psychologists.

New for this edition, Gross is supported by an extensive and interactive Dynamic Learning resource package – a rich multimedia package that complements the book – which will help students to learn, and course leaders to deliver that learning.

**NEW  
edition**

### A comprehensive guide for psychology students:

- Helps students to understand and evaluate classic and contemporary Psychology
- The one-stop-shop for Psychology, with everything students need to know in one place
- Packed with accessible features: Introductions and Summaries, Ask Yourself Questions, Key Studies, Critical and Cross-Cultural material
- Leading figures in contemporary Psychology, including Elizabeth Loftus, Andy Young, Chris Frith and David Canter provide fresh perceptions

**CONTENTS:** Part 1: The Nature and Scope of Psychology / Part 2: The Biological Basis of Behaviour and Experience / Part 3: Cognitive Psychology / Part 4: Social Psychology / Part 5: Developmental Psychology / Part 6: Individual Differences / Part 7: Issues and Debates

## Themes, Issues and Debates in Psychology

Third Edition

**Richard Gross**, *Bestselling psychology author, and Honorary Lecturer in Psychology, Leicester University, UK*

*'The adoption of Themes, Issues and Debates in Psychology as required teaching...can lead students to abandon a learning mode focused on assimilation and encourage them to think critically about what they are learning'*

Metapsychology Website

This edition has been fully updated, and contains a completely new chapter on 'Positive Psychology.' With excellent chapter summaries, useful websites and suggestions for further reading,

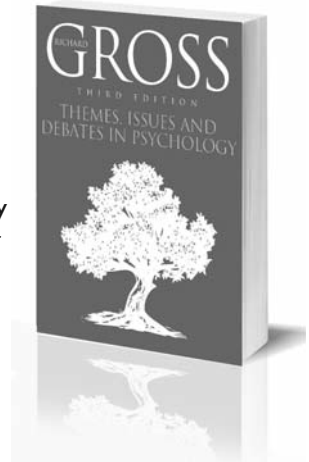

*Themes, Issues and Debates in Psychology* remains an ideal text for all students wishing to view their subject in a way that is more true to our lives. The thematic approach also ensures the book is of great value to a wide range of students, from A level to undergraduate.

- Designed to stimulate critical thinking
- Encourages an integrated approach to essay writing and presentations
- Written by Richard Gross, the leading author in the field

**CONTENTS:** The Person as Psychologist / Positive Psychology / The Idiographic and Nomothetic Approaches to the Study of Behaviour / Traits and Situations as Causes of Behaviour / Heredity and Environment / Psychology, Women and Feminism / Normality and Abnormality / Cross-cultural Psychology / Psychology and Ethics / Psychology as Science / Free Will and Determinism / Consciousness and the Mind-Brain Relationship / Parapsychology / Theoretical Approaches to Psychology

## New / Lead Titles

## Classic Case Studies in Psychology

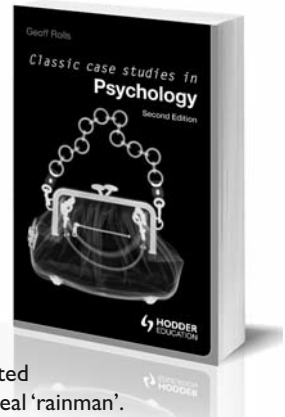

Second Edition

**Geoff Rolls**, Lecturer in Psychology Peter Symonds College, Winchester, UK

With a foreword by the celebrated Richard Gross, these memorable case studies provide undergraduate psychologists with a fascinating insight into the human mind and behaviour.

*Classic Case Studies in Psychology* is ideal for newcomers to psychology who want to illustrate points-of-view with impressive and unforgettable examples. The new edition features recent research findings on each case study, as well as three brand new cases: the ape who could communicate; the much debated case of Holly Ramona and repressed memory; and Kim Peek, the real 'rainman'.

**NEW  
edition**

- Stimulating case studies provides a fresh and inspiring alternative to dry, theory-heavy introductions to abnormal psychology
- Includes three new cutting-edge cases presenting fascinating modern insights into the human mind and behaviour
- Glossary of psychological terms makes the text accessible to all
- [www.hodderplus.com/psychology](http://www.hodderplus.com/psychology) with further reading, helpful weblinks, MCQs and other self-assessment questions enables students to test their knowledge

**CONTENTS:** Introduction / Part 1: Cognitive Psychology / The Man Who Couldn't Forget: The Story of Solomon Shereshevsky ('S') / The Man With No Past: The Story of Henry M ('HM') / The Man Who Was Disappointed by What He Saw: The Story of S.B. / Kim Peek: The Real Rain Man / Holly Ramona and the Nature of Memory / Part 2: Social Psychology / The Girl Who Cried Murder: The Story of Catherine 'Kitty' Genovese / Part 3: Developmental Psychology / Innocence Lost: The Story of Genie / The Boy Who Was Never a Girl: The Story of David Reimer / The Wild Boy of Aveyron: The Story of Victor / Two Little Boys: The Story of Little Albert and Little Peter / Part 4: Individual Differences / The Boy Who Needed to Play: The Story of Dibs / The Man Who Was Turned on by Prams and Handbags / Freud's Analysis of Phobia in a Young Boy: The Story of Little Hans / The Three Faces of Eve: The Story of Chris Sizemore / The Boy Who Couldn't Stop Washing: A Story of OCD / Part 5: Physiological Psychology / The Men Who Didn't Sleep: The Story of Peter Tripp and Randy Gardner / The Man who Lived With a Hole in His Head: The Story of Phineas Gage / The Man with No Brain? / Part 6: Comparative Psychology / Talking to the Animals: Washoe and Roger Fouts / Summary / Glossary

## New / Lead Titles

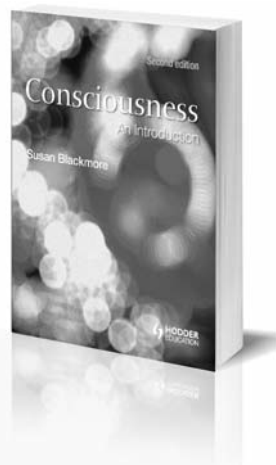

**Consciousness**

Second Edition

**Susan Blackmore**, *Visiting Professor of Psychology, University of Plymouth, UK*

Written by one of the world's foremost experts and covering neuroscientific, psychological and philosophical theories, this is the definitive text for all students of consciousness. This groundbreaking textbook was the first of its kind to bring together all the major theories of consciousness studies, from those based on neuroscience to those based on quantum theory or Eastern philosophy.

The new edition has been fully revised to include the latest developments in neuroscience, brain scanning techniques, and artificial consciousness and robotics. For all those intrigued by what it means to be, to exist, this book could radically transform your understanding of your own consciousness.

NEW  
edition**Students will find all they need to know:**

- **Authoritative** – Written by Susan Blackmore, one of the world's foremost experts on consciousness
- **Up-to-date** – New, expanded section on neuroscience including the very latest research
- **Comprehensive** – examines all conscious topics including the nature of the self, near death experiences and the effects of drugs, dreams and meditation
- **[www.hodderplus.com/psychology](http://www.hodderplus.com/psychology)** – includes MCQs and self-test exercises for students to monitor their progress, as well as flashcards to aid revision

**CONTENTS:** Introduction / Section 1: The Problem / What's the Problem? / What Is It Like To Be...? / Conscious or Unconscious? / Section 2: The World / The Theatre of the Mind / Attention and Timing / The Grand Illusion / Section 3: The Self / Egos, Bundles and Multiple Selves / Theories of Self / Agency and Free Will / Section 4: The Brain / The Neural Correlates of Consciousness / The Unity of Consciousness / Damaged Brains / Section 5: Evolution / The Evolution of Consciousness / The Function of Consciousness / Animal Minds / Section 6: Artificial Consciousness / Minds and Machines / Could a Machine be Conscious? / How to Build a Conscious Machine / Section 7: Borderlands / Unconscious Processing / Reality and Imagination / The Paranormal / Section 8: Altered States of Consciousness / Drugs and Altered States / Sleep Dreams and Hypnosis / Exceptional Human Experience / Section 9: First-Person Approaches / The View From Within / Meditation and Mindfulness / Waking Up

## New / Lead Titles

# Individual Differences and Personality

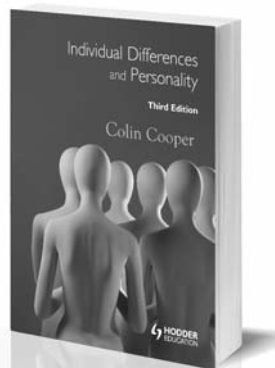

Third Edition

**Colin Cooper**, Senior Lecturer in Psychology, Queen's University, Belfast, UK

*Individual Differences and Personality* is unique in its comprehensive coverage of both personality theories and the methodological issues associated with personality and psychometric testing.

This new edition offers new chapters on emotional intelligence and practical applications as well as expanded coverage of the 'Big 5 model' of personality and positive psychology.

**NEW**  
edition

**An essential and enjoyable read for all psychology students wishing to gain a broad understanding of personality and psychometrics.**

- New colour design with numerous charts and tables make the text engaging and easy to navigate
- Pedagogical features including chapter summaries, suggestions for more in-depth reading and a comprehensive glossary support learning
- Lively self-assessment questions for each chapter encourage critical thinking and deeper engagement with the subject
- Explores the applications, not just the theories, with fascinating real life examples from the corporate to the criminal world
- [www.hodderplus.com/psychology](http://www.hodderplus.com/psychology) contains MCQs, slides, sample exam questions and ideas for laboratory classes providing lecturers with comprehensive support
- Free online resources for students include revision flashcards, interactive glossary, weblinks and revision summary notes

**CONTENTS:** Part I: Theories and Applications / Kelly and Rogers / Freud and Post-Freudians / Broad Theories of Personality / Emotional Intelligence / Narrow Personality Traits / Biological and Social Models of Personality / Structure and Measurement of Abilities / Ability Processes / Personality and Ability Over the Lifespan / Environmental and Genetic Determinants of Personality & / Mood and Motivation / Applications of Personality and Ability Testing / Part II: Methods / Measuring Individual Differences / Reliability and Validity of Psychological Tests / Factor analysis / Performing and Interpreting Factor Analyses / Constructing a Test / Problems with Tests / Conclusions

## Topics in Applied Psychology

SERIES

This series provides a comprehensive academic and professional insight into six popular options. Each title in the *Topics in Applied Psychology* series:

- Benefits from expert writers writing for a UK audience while maintaining an international perspective
- Presents multiple perspectives, alongside real life applications and recent developments in research
- Promotes effective self-learning thanks to clearly defined learning objectives at the beginning of each chapter
- Provides opportunity to consolidate concepts through activities, sample essay questions, end-of-chapter key phrases and further reading lists
- Describes and evaluates research methods and techniques to enhance confidence and expertise
- Highlights job and career opportunities enabling students to see the practical application of their study

## New / Lead Titles

## Research Methods and Statistics in Psychology

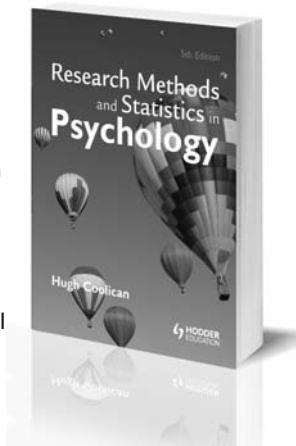

Fifth Edition

**Hugh Coolican**, *Principal Lecturer, University of Coventry, UK*

*Research Methods and Statistics in Psychology* provides students with the most readable and comprehensive survey of research methods, statistical concepts and procedures in psychology today.

Unlike other introductory texts, there is discussion of ecological validity, the null hypothesis and the role of cross-cultural psychology studies. Qualitative research is included in the central research methods chapters as well as being highlighted in specialist chapters which cover content analysis, grounded theory, interpretative phenomenological analysis (IPA), narrative analysis, discourse analysis and how to tackle a qualitative research project.

The book provides clear coverage of statistical procedures, and includes everything needed at undergraduate level from nominal level tests to multi-factorial ANOVA designs, multiple regression and log linear analysis. In addition, the book provides detailed and illustrated SPSS instructions (updated to version 16) for all statistical procedures, including data entry and interpreting output, thus eliminating the need for an extra SPSS textbook.

- Covers both qualitative and quantitative methods
- Exercises encourage reflection on, and questioning of, central issues
- Entertaining anecdotes and examples memorably illustrate both the successes and pitfalls of certain research methods
- Offers advice on report writing along with examples, taking students through the process step-by-step and fully preparing them to embark on their own research projects
- [www.hodderplus.com/psychology](http://www.hodderplus.com/psychology) features interactive exercises, revision flash cards, a glossary, data sets for use with SPSS and lecturer resources

**CONTENTS:** Psychology, Science and Research / Measuring People – Variables, Samples and the Qualitative Critique / Experiments and Experimental Designs in Psychology / Validity in Psychological Research / Quasi-experiments and Non-experiments / Observational Methods – Watching and Being with People / Interview Methods – Asking People Direct Questions / Psychological Tests and Measurement Scales / Comparison Studies – Cross-sectional, Longitudinal and Cross-cultural Studies / Qualitative Approaches in Psychology / Statistics – Organising the Data / Graphical Representation of Data / Frequencies and Distributions / Significance Testing – Was it a Real Effect? / Testing for Differences Between Two Samples / Tests for Categorical Variables and Frequency Tables / Correlation / Multi-level Analysis – Differences Between More Than Two Conditions / Multi-factorial Designs / ANOVA for Repeated Measures Designs / Choosing a Significance Test for your Data (and Internet resources) / Analysing Qualitative Data / Ethical Issues in Psychological Research / Planning your Practical and Writing Up your Report
